sport that's capturing the hearts
of players around the world

FZ FORZA®

INNOVATED IN DENMARK

Are you ready to take your game to the next level? We at FZ FORZA are excited to introduce our new collection of high-quality pickleball products!

If you haven't heard of pickleball before, it's a fast-paced paddle sport that combines elements of tennis, badminton, and table tennis. It's played on a smaller court with a lower net and a paddle instead of a racket. The sport is gaining popularity all over the world, and we at FZ FORZA have taken notice.

In 2022, we launched our first pickleball collection as part of the SS2023 lineup. Now, with the new collection, we're introducing new paddles with updated designs and techniques to help players perform their best on the court. Whether you're a seasoned pickleball pro or new to the sport, we've got the gear you need to succeed. Try it out for yourself and see what all the buzz is about!

100% GRAPHITE

Provides lightweight maneuverability, increased power, and precise control for optimal gameplay performance.

POLYMER HONEYCOMB CORE

This feature ensures a high-quality construction, enhancing playability and providing comfortable performance.

MASSIVE SPIN

Features a rough surface, optimizing ball contact and increasing spin potential for enhanced gameplay.

LESS VIBRATION

Paddles with a polymer honeycomb core and thickness on/above 14mm minimize vibration, absorbing shocks for a smoother, more comfortable playing experience.

HYPER FOAMED EDGE

A specialized foam is injected around the edge of the paddle and wrapped with advanced carbon fiber, adding stability to increase the sweet spot consistency from edge to edge. This provides a comfortable, solid feel around the entire surface which also provides consistent rebound during play.

GOOD CONTROL

This signifies a well-balanced weight class, optimizing stroke control for enhanced precision and easy handling in this racket.

EXTREME 3D SPIN

A 3D printed surface ensures an excellent ball contact and maximizing the potential for generating spin during gameplay.

ULTRA POWER

The 3K-18K graphite construction offers increased strength and slightly more weight. This optimizes the power behind each stroke for maximum impact.

HANDLE POWER

The advanced composite molded handle provides increased power and reduced vibrations. This technology will support a more comfortable play with extra power.
